Lublin is a city where many famous personalities, not only Polish, were born, lived, created their works and followed their professional and social missions. They weren't always associated with Lublin throughout their entire lives. This tourist trail was established to remind us about the most famous and well-known historic characters whose lives and activity are associated with our city.

Among them are Polish kings, popular poets and writers, musicians, scientists, as well as great church dignitaries - including the Primate of the Millennium, Cardinal Priest Stefan Wyszyński and Pope John Paul II.
